

EndNote X and QUAKELINE® Installation Directions

Millions of researchers, scholarly writers, students, and librarians use [EndNote](#) to search online bibliographic databases, organize their references, images and PDFs in varied language, and create bibliographies and figure lists instantly. We are pleased to offer our QUAKELINE® users access to a filter file which imports QUAKELINE® records into EndNote. A direct connection to QUAKELINE® through EndNote is not possible at this time.

To begin, you must have a copy of EndNote X installed on your computer.

- If you are affiliated with the University at Buffalo, you may obtain a free copy of EndNote X from this Libraries' site: <http://ublib.buffalo.edu/libraries/endnote/index.html>
- If you are not affiliated with the University at Buffalo, you will need to obtain the software through your institution or by purchasing it. For more information about EndNote X, visit <http://www.endnote.com/enhome.asp>

Installing QUAKELINE® Filter File (QKLN)

1. Download the QKLN filter file at http://libweb.lib.buffalo.edu/endnote/endNote_filters.asp?Database=Q
2. Save the filter file to the EndNote folder on your computer by following these steps:
 - Go to My Computer
 - Select your computer's hard drive designation
 - Go to Program Files
 - Locate and select the EndNote X folder
 - Select the Filters folder
 - Save file
3. Launch EndNote X
4. Select
 - Edit
 - Import Filters
 - Open Filter Manager
5. Select "Q" or scroll down to Q, where you should see QKLN in the list

Downloading records from QUAKELINE®

1. Perform a search in QUAKELINE®
2. When you locate a record of interest, click on "Print Version" at the bottom of the page
3. Select
 - File
 - Save Page As
 - Name the file
 - Select **text file** for file type
 - Save file where you will be able to retrieve it later
 - Repeat as necessary for additional records
4. Within your EndNote library
 - Select File
 - Select Import
5. Browse for your saved text file
 - Select the text file you saved
 - Under Import Option, select the QKLN filter you saved through the process above
 - Select Import (your record should import automatically)
 - Once imported, double-click the entry to edit it.
 - Select the appropriate reference type (journal article, report, book, etc) from the menu
 - You will probably need to rearrange some data; however all the components needed for a proper citation should be included
