Table of Contents

Session 1A1: Design & Analysis of Major Bridges

Session Moderator: Kevin Thompson, California Department of Transportation

Paper No. A01: Seismic Characteristics of Bridge Steel Pedestals

Monique C. Hite, Reginald DesRoches, Roberto Leon, School of Civil and Environmental Engineering, Georgia Institute of Technology; Paul Liles, Jr. and Y. Stanley Kim, Georgia Department of Transportation

Paper No. A02: Design and Analysis of Precast Concrete Bridges in Areas of High or Moderate Seismicity

Bijan Khaleghi, Washington State Department of Transportation

Paper No. A03: Retrofit of a Historic Three-Hinge Arch Bridge

Sherif S. Morcos, HDR Engineering, Inc.

Paper No. A04: Seismic Retrofit of the Posey Tube: A Discussion of Soilercrete and the Construction of Large Diameter Triple Fluid Jet Grout Columns Over the Oakland Estuary in California

Marcia E. Kiese, California Department of Transportation; and Thomas S. Lee, Parsons Brinckerhoff Quade & Douglas, Inc.

Paper No. A05: The Seismic Analysis and Design of a Steel Plate Girder Bridge with an Emphasis on Practical Considerations

Clint M. Krajnik, Federal Lands Highway Bridge Office, Federal Highway Administration

Session 1B1: Foundations & Geotechnical Considerations

Session Moderator: Michel Bruneau, MCEER

Paper No. B01: Effect of Backfill Soil Type on Stiffness and Ultimate Capacity of Bridge Abutments: Large-scale Tests

A. Bozorgzadeh, Scott A. Ashford, and Jose I. Restrepo, Department of Structural Engineering, University of California San Diego

Paper No. B02: Mechanical Axial Force Transfer within Cast-In-Steel-Shell Piles – Verification through Full-Scale Experimentation and Finite Element Analysis

Michael Gebman, Scott A. Ashford and José I. Restrepo, Department of Structural Engineering, University of California San Diego

Paper No. B03: Field Testing and Analytical Modeling of a Reinforced Concrete Embedded Pile Under Lateral Loading

Eric Ahlberg, Changsoon Rha, Jonathan P. Stewart, Robert L. Nigbor, John W. Wallace, and Ertugrul Taciroglu, Department of Civil and Environmental Engineering, University of California Los Angeles

Paper No. B04: Overcoming Hurdles that Limit the Application of Nonlinear Seismic Ground Response Analysis in Engineering Practice

Jonathan P. Stewart and On-Lei Annie Kwok, Department of Civil and Environmental Engineering, University of California, Los Angeles; Youssef M.A. Hashash, Department of Civil and Environmental Engineering, University of Illinois at Urbana-Champaign; Neven Matasovic, GeoSyntec Consultants; Robert Pyke, Consulting Engineer; Zhiliang Wang, Geomatrix Consultants, Inc. and Zhaohui Yang, URS Corporation

Paper No. B05: Global and Structural Stability Assessments of Fort Mason Tunnel for Seismic Rehabilitation

Zia Zafir, Kleinfelder Inc.; Stephen Klein, Jacobs Associates; and Matthew DeMarco, Federal Highway Administration

Session 1A2: Use of Innovative Technologies & Materials

Session Moderator: Ian Buckle, University of Nevada Reno

Paper No. A06: Multihazard-Resistant Highway Bridge Pier

Michel Bruneau and Shuichi Fujikura, MCEER and Department of Civil, Structural and Environmental Engineering, University at Buffalo, The State University of New York; and Diego Lopez-Garcia, Departamento de Ingenieria Estructural y Geotecnica, Pontificia Universidad Catolica de Chile

Paper No. A07: New Seismic Retrofit Technologies for a Historic Bridge in California

Paul Chung, Mohammad Ravanipour and Ray Wolfe, California Department of Transportation

Paper No. A08: Seismic Design of Circular Bridge Columns with Unstressed Prestressing Strand for Transverse Reinforcement

Andrew Budek, Department of Civil Engineering, Texas Tech University; Chin Ok Lee, Department of Civil Engineering, Chungnam University; and M.J. Nigel Priestley, Department of Structural Engineering, University of California at San Diego

Paper No. A09: Rocking of Bridge Piers Subjected to Multi-Directional Earthquake Excitation

Andres Espinoza and Stephen Mahin, Department of Civil Engineering, University of California Berkeley

Paper No. A10: Retrofitting the Milford-Montague Truss: Challenges and Solutions

Thomas P. Murphy and Michael C. Irwin, Modjeski and Masters, Inc.

Session 1B2: Performance Criteria & Economic Considerations

Session Moderator: Elmer Marx, Alaska Department of Transportation

Paper No. B06: A Comparative Performance-Based Seismic Assessment of Traditional and Enhanced-Performance Bridge Pier Systems

Won K. Lee and Sarah L. Billington, Department of Civil and Environmental Engineering, Stanford University

Paper No. B07: A Rational Method for Calibrating Appropriate Response Modification Factors for Seismic Design of Bridge Columns

Abdallah Mechakhchekh and Michel Ghosn, Department of Civil Engineering, The City College of New York & The Graduate Center of CUNY

Paper No. B08: Implementation of Displacement Based Design for Highway Bridges

Vinicio Suarez and Mervyn Kowalsky, Department of Civil, Construction and Environmental Engineering, North Carolina State University

Paper No. B09: Implications of Future Seismic Bridge Design Provisions for Illinois

Daniel H. Tobias, Ralph E. Anderson, Chad E. Hodel, William M. Kramer and Riyad M. Wahab, Bureau of Bridges and Structures, Illinois Department of Transportation

Paper No. B10: Seismic Hazard for California Bridges Using Deterministic and Probabilistic Methods

Fadel Alameddine and Mark Yashinsky, Office of Earthquake Engineering, California Department of Transportation

Session 1A3: Emerging Design & Retrofit Technologies

Session Moderator: Daniel Tobias, Illinois Department of Transportation

Paper No. A11: Seismic Design of Floating Bridges

Michael J. Abrahams, Parsons Brinckerhoff Quade & Douglas, Inc.

Paper No. A12: Seismic-Resistant Connections for Prefabricated Segmental Bridge Columns

Yu-Chen Ou, Department of Civil, Structural and Environmental Engineering, University at Buffalo, State University of New York; Ping-Hsiung Wang, National Center for Research on Earthquake Engineering; Kuo-Chun Chang, Department of Civil Engineering, National Taiwan University; and George C. Lee, Department of Civil, Structural and Environmental Engineering, University at Buffalo, State University of New York

Paper No. A13: Proof-of-Concept Testing and Finite Element Modeling of Self-Stabilizing Hybrid Tubular Links for Eccentrically Braced Frames

Jeffrey W. Berman and Michel Bruneau, Department of Civil, Structural and Environmental Engineering, University at Buffalo, State University of New York

Session 1B3: Effects of Near-Field Earthquake on Bridges

Session Moderator: Hamid Ghasemi, Federal Highway Administration

Paper No. B11: An Overview of the Project of Next Generation of Ground Motion Attenuation Models for Shallow Crustal Earthquakes in Active Tectonic Regions

Brian Chiou, Division of Research and Innovation, California Department of Transportation; Maurice Power, Geomatrix Consultants; Norman Abrahamson, Pacific Gas and Electric Company; and Clifford Roblee, NEES Consortium Inc.

Paper No. B12: Effects of Near-Fault Vertical Ground Motions on Seismic Response of Highway Bridges

Emrah Erduran, Zeynep Yilmaz, Sashi Kunnath, Norman Abrahamson and Y. H. Chai, Department of Civil and Environmental Engineering, University of California Davis; and Mark Yashinsky and Li-Hong Sheng, California Department of Transportation

Paper No. B13: Selection of Forward-Directivity Motions for Non Linear Analyses of Bridges

Joanna L. Gillie, HWA GeoSciences Inc.; Adrian Rodriguez-Marek, Department of Civil and Environmental Engineering, Washington State University; and Cole C. McDaniel, Architectural Engineering Department, California Polytechnic State University

Session 2A1: Design & Analysis of Major Bridges

Session Moderator: Stephen Maher, Transportation Research Board

Paper No. A14: Geotechnical Earthquake Engineering Experience from Seismic Retrofit and New Design Projects of Major Toll Bridges in California

Hubert K. Law and Ignatius Po Lam, Earth Mechanics, Inc.

Paper No. A15: Analytical Assessment of a Major Bridge in the New Madrid Seismic Zone

Amr Elnashai, Aman Mwafy and Oh-Sung Kwon, Mid-America Earthquake Center, University of Illinois at Urbana-Champaign

Paper No. A16: Seismic Analysis and Design of a Multi-Span Bridge in a Region of High Seismicity using SCDOT Seismic Specifications

Amos Liu and William Stiller, Ralph Whitehead Associates; and Lucero Mesa, South Carolina Department of Transportation

Paper No. A17: Collapse Simulation of RC Frame under Earthquakes. II: Verification Studies - Collapse of Cypress Viaduct

Yan Zhou, Leiming Zhang and Xila Liu, Department of Civil Engineering, Shanghai Jiao Tong University

Session 2B1: Soil-Structure Interaction & Foundations

Session Moderator: Lucero Mesa, South Carolina Department of Transportation

Paper No. B14: Seismic Energy Dissipation by Foundation Rocking for Bridge SFS Systems (Abstract only)

Bruce Kutter, Boris Jeremic, Stephen Mahin, Jose Ugalde, Sivapalan Gajan and George Hu, Department of Civil and Environmental Engineering, University of California Davis

Paper No. B15: Three-Dimensional Nonlinear Finite-Element Soil-Abutment Structure Interaction Model for Skewed Bridges

Anoosh Shamsabadi, Office of Earthquake Engineering, California Department of Transportation; Mike Kapuskar, Earth Mechanics, Inc.; and Amir Zand, Department of Civil Engineering, University of Southern California

Paper No. B16: Comparison of Direct Method Versus Substructure Method for Seismic Analyses of a Skewed Bridge

Anoosh Shamsabadi, Office of Earthquake Engineering, California Department of Transportation; Hubert Law, Earth Mechanics, Inc.; and Geoffrey R. Martin, Department of Civil Engineering, University of Southern California

Paper No. B17: Passive Force-Deflection Relationships from Full-Scale Tests

Kyle M. Rollins, Civil Engineering Department, Brigham Young University; and R.T. Cole, IGES, Inc.

Paper No. B18: Nonlinear Seismic Soil-Abutment-Structure Interaction Analysis of Skewed Bridges

Anoosh Shamsabadi, Office of Earthquake Engineering, California Department of Transportation; Mike Kapuskar, Earth Mechanics, Inc.; and Geoffrey R. Martin, Department of Civil Engineering, University of Southern California

Session 2A2: Instrumentation & Monitoring Systems

Session Moderator: Robert Stott, California Department of Transportation

Paper No. A18: Real-time, State-of-the-Art Seismic Monitoring of the Integrated Cape Girardeau Bridge Array, Data and Analyses

Mehmet Çelebi, Earthquake Hazards Team, U.S. Geological Survey

Paper No. A19: Lateral Deformation Capacity of Concrete Bridge Piers

Sungjin Bae and Oguzhan Bayrak, Department of Civil, Architectural and Environmental Engineering, University of Texas at Austin

Paper No. A20: Caltrans/CGS Downhole Geotechnical Arrays

Pat Hipley, California Department of Transportation; and Anthony Shakal and Hamid Haddadi, California Strong Motion Instrumentation Program, California Geological Survey

Paper No. A21: Seismic Instrumentation at the I-40 Bridge in Memphis, Tennessee

Shahram Pezeshk and Mitch Withers, Department of Civil Engineering, University of Memphis

Paper No. A22: ShakeCast: Facilitating the Use of ShakeMap for Post-Earthquake Decision-Making and Response within Caltrans and other Critical Lifeline Communities

David J. Wald and Kuo-Wan Lin, National Earthquake Information Center, U.S. Geological Survey; Bruce Worden, U.S. Geological Survey; and Loren Turner, Division of Research & Innovation, GeoResearch Group, California Department of Transportation

Session 2B2: Liquefaction & Mitigation Strategies

Session Moderator: E.V. Leyendecker, US Geological Survey

Paper No. B19: Lateral Response of Isolated Piles in Liquefied Soil with Lateral Soil Spreading

Mohamed Ashour, Department of Civil Engineering, West Virginia University Institute of Technology; Gary Norris, Department of Civil Engineering, University of Nevada Reno; and JP Singh, JP Singh and Associates

Paper No. B20: Evaluation of Methods for Analyzing the Seismic Response of Piles Subjected to Liquefaction-Induced Loads

S.R. Rajapathy and T.C. Hutchinson, Department of Civil and Environmental Engineering, University of California Irvine

Paper No. B21: Numerical Simulation of Soil-Foundation Interaction Subjected to Lateral Spreading

Yohsuke Kawamata, Scott A. Ashford, and Teerawut Juirnarongrit, Department of Structural Engineering, Jacobs School of Engineering, University of California San Diego

Paper No. B22: A Probabilistic Design Procedure that Incorporates the Pile-Pinning Effect in Bridge Foundations Undergoing Liquefaction-Induced Lateral Spreading

Christian Ledezma and Jonathan D. Bray, Department of Civil and Environmental Engineering, University of California Berkeley

Paper No. B23: Liquefaction Mitigation using Stone Columns and Wick Drains for Utah Bridges

Kyle M. Rollins, Department of Civil and Environmental Engineering, Brigham Young University; Bradford E. Price, RBG Engineering; Emily Dibb, Department of Civil & Environmental Engineering, Brigham Young University; and Jim B. Higbee, Utah Department of Transportation

Session 2A3: Lessons Learned from Recent Earthquakes

Session Moderator: Arun Shirole, Arora Associates

Paper No. A23: Seismic Response of the Hwy 46/Cholame Creek Bridge During the 2004 Parkfield Earthquake

Tom Boardman, Kleinfelder, Inc.; and Anthony V. Sanchez, T.Y. Lin International

Paper No. A24: Lessons Learned from the Seismic Retrofit of the Posey and Webster Street Tubes in Alameda County, California

Thomas S. Lee, Parsons Brinckerhoff Quade & Douglas, Inc.; and Randy Anderson and Rod Murray, California Department of Transportation

Paper No. A25: Post Seismic Inspection and Capacity Assessment of Reinforced Concrete Bridge Columns

Marc J. Veletzos, Marios Panagiogou and Jose I. Restrepo, Department of Structural Engineering, Jacobs School of Engineering, University of California San Diego; and Stephen Sahs, Office of Structure Maintenance and Investigation, California Department of Transportation

Paper No. A26: Study on the Seismic Settlement of the Alaskan Way Viaduct after the February 28, 2001 Nisqually Earthquake

Hongzhi Zhang, Bridge and Structures Office, Washington State Department of Transportation

Session 2B3: Emerging Design & Retrofit Technologies

Session Moderator: Genda Chen, University of Missouri Rolla

Paper No. B24: Damping-Enhanced Seismic Strengthening of RC Columns for Multiple Performance Objectives

Genda Chen and Kazi R. Karim, Department of Civil Engineering, University of Missouri Rolla

Paper No. B25: Use of Partially Prestressed Reinforced Concrete Columns to Reduce Post-Earthquake Residual Displacements of Bridges

Stephen Mahin, University of California Berkeley; Junichi Sakai, Public Works Research Institute; and Hyungil Jeong, University of California Berkeley

Paper No. B26: Seismic Performance and Design of Bridges with Curve and Skew

J. Jerry Shen, LENDIS/Federal Highway Administration; and W. Phillip Yen, Office of Infrastructure R&D, Federal Highway Administration

Paper No. B27: NCHRP 12-74 Development of Precast Bent Cap Systems for Seismic Regions – Background and Progress

Matthew J. Tobolski, Department of Structural Engineering, Jacobs School of Engineering, University of California San Diego; Eric E. Matsumoto, Department of Civil Engineering, California State University Sacramento; and José I. Restrepo, Department of Structural Engineering, Jacobs School of Engineering, University of California San Diego

Paper No. B28: Improved Seismic Performance of Precast Segmental Bridges Using Jointed Column Connections and Unbonded Tendons

Marc J. Veletzos and Jose I. Restrepo, Department of Structural Engineering, Jacobs School of Engineering, University of California San Diego

Session 3A1: Seismic Risk Assessment of Highway Networks

Session Moderator: Amr Elnashai, Mid-America Earthquake Center

Paper No. A27: Probabilistic Seismic Hazard Assessment for Spatially Distributed Systems

Renee Lee and Anne S. Kiremidjian, Department of Civil and Environmental Engineering, Stanford University

Paper No. A28: Seismic Vulnerability of Typical Multiple-span California Highway Bridges

Kevin Mackie and Bozidar Stojadinovic, Department of Civil and Environmental Engineering, University of California Berkeley

Paper No. A29: Evaluation of Bridge Retrofit in Regions of Low-to-Moderate Seismicity

Jamie Ellen Padgett and Reginald DesRoches, School of Civil and Environmental Engineering, Georgia Institute of Technology

Paper No. A30: Seismic Analysis of a Roadway System in the Los Angeles, California Area

Stuart D. Werner, Seismic Systems & Engineering Consultants; Sungbin Cho, ImageCat, Inc.; Craig E. Taylor, Natural Hazards Management Inc.; Jean-Paul Lavoie, Geodesy; and Charles K. Huyck, ImageCat, Inc.

Paper No. A31: Seismic Vulnerability Assessments of Bridges in Areas of Low to Moderate Seismic Activity

Artur Kasperski and Joseph B. Matarazzo, Earth Tech; José Santos, Structures Unit, New York State Department of Transportation; and Gary Wang and Chris S.C. Yiu, Imbsen Consulting Engineers, PC

Session 3B1: International Technologies & Practices

Session Moderator: Roland Nimis, Caltrans

Paper No. B29: Seismic Design Practice of Steel Bridges in California

Lian Duan, California Department of Transportation

Paper No. B30: Seismic Design of Coronilla Viaduct

Joaquín Mejía Ramírez, Manuel González Ureña and Jose de Jesus Alvarez, Universidad Michoacana de San Nicolas de Hidalgo

Paper No. B31: China-U.S. Comparative Study on Seismic Design Philosophy and Practice for a Long Span Arch Bridge

Yan Xu, Department of Bridge Engineering, Tongji University; George C. Lee, Department of Civil, Structural & Environment Engineering, University at Buffalo, State University of New York; and Li-chu Fan and Shi-de Hu, Department of Bridge Engineering, Tongji University

Paper No. B32: New International Standard for Elastomeric Seismic-Protection Isolators

Nobuo Murota, Bridgestone Corporation; James M. Kelly, Department of Civil and Environmental Engineering, University of California Berkeley; Keith Fuller, Tun Abdul Razak Research Centre; Fu Lin Zhou, Earthquake Engineering Research Test Center, Guangzhou University; Toshio Nishi, Department of Organic and Polymeric Materials, Tokyo Institute of Technology; Toshikazu Yoshizawa and Chiaki Sudou, Bridgestone Corporation; and Fumihiko Yazaki, Yokohama Rubber Company

Paper No. B33: Inelastic Response of the San Antonio Viaduct Subjected to Synthetic Ground Acceleration Records

Héctor Sánchez Sánchez and Marcelino Cruz González, SEPI, ESIA, IPN

Poster Session

Coordinator: Reginald DesRoches, Georgia Institute of Technology

Poster No. 01: Collapse Simulation of RC Frames under Earthquakes. I: Theoretical Modeling

Leiming Zhang, Yan Zhou and Xila Liu, Department of Civil Engineering, Shanghai Jiao Tong University

Poster No. 02: Refined Seismic Design of a Bridge Structure on Soft Soils

Paul Chung, California Department of Transportation

Poster No. 03: Seismic Behavior of the Pinzandaran Bridge

H. Hernández-Barrios, J. Álvarez-Sereno and M. Jara-Díaz, Faculty of Engineering, Universidad Michoacana de San Nicolas de Hidalgo

Poster No. 04: Seismic Performance of Alaska Bridges by Denali 2002 Earthquakes

J. Leroy Hulsey, Department of Civil and Environmental Engineering, University of Alaska Fairbanks; Dileep Cherlopalle, The Weintraub Organization Ltd; and Z. John Ma, Department of Civil and Environmental Engineering, University of Tennessee Knoxville

Poster No. 05: Seismic Retrofit Needs of the Historic McCullough Bridge - One of Oregon's Longest Bridges

Ling Shang, Bob Grubbs and James Burford, Oregon Department of Transportation

Poster No. 06: Validation of Finite Element Model Ability to Evaluate Residual Live Load Capacity of Bridge Columns

Vesna Terzic, Kevin Mackie and Bozidar Stojadinovic, Department of Civil and Environmental Engineering, University of California Berkeley

Poster No. 07: Site Identification for Port Access Bridge in Anchorage by Extended Kalman Filter with the Recorded Seismic Data

He Liu, Mansheng Wang and Feifei Bai, School of Engineering, University of Alaska Anchorage; Yibin Zheng, Department of Electrical and Computer Engineering, University of Virginia Charlottesville; and Xiyuan Zhou, College of Architecture and Civil Engineering, Beijing University of Technology

Poster No. 08: The Effect of Nonlinear Soil Behavior on the Seismic Response of RC Pile-Columns

Andrew Budek, Department of Civil Engineering, Texas Tech University; and Gianmario Benzoni, Department of Structural Engineering, University of California San Diego

Poster No. 09: Seismic Response of Bridge Approach Fill Sites Improved by Deep Mixing

Raj V. Siddharthan, Department of Civil Engineering, University of Nevada Reno; Ali Porbaha, Department of Civil Engineering, California State University Sacramento; and Aravinthan Thurairajah, Department of Civil Engineering, University of Nevada Reno

Poster No. 10: Equivalent Linear Stiffnesses of Piles and Pile Foundations

Jin-xing Zha, Division of Geotechnical Design and Services, California Department of Transportation

Poster No. 11: Seismic Risk Assessment of Steel Highway Bridges

Ying Pan, Gilsanz Murray Steficek LLP; and Anil Kumar Agrawal and Michel Ghosn, Department of Civil Engineering, The City College of the City University of New York

Poster No. 12: The Effect of Bridge and Highway System Improvements on the Network's Accessibility Reliability after a Major Earthquake

Afshin Shariat Mohymani, Navid Kalantari and Poria Mohammadian, Department of Civil Engineering, Iran University of Science and Technology

Poster No. 13: Probabilistic Seismic Loss Analysis for Bridges in the Central United States

Erdem Karaca and Nicolas Luco, U.S. Geological Survey

Poster No. 14: Bayesian Updating of Bridge Fragility Curves using Sensor Data

John-Michael Wong, Kevin Mackie and Bozidar Stojadinovic, Department of Civil and Environmental Engineering, University of California Berkeley

Poster No. 15: Method for Post-Earthquake Highway Bridge Repair Cost Estimation

Kevin Mackie, John-Michael Wong and Bozidar Stojadinovic, Department of Civil and Environmental Engineering, University of California Berkeley

Poster No. 16: The Hayward Fault Network and Bay Area Bridges

Douglas Dreger, Robert Nadeau, Robert Uhrhammer and Richard Clymer, Berkeley Seismological Laboratory, University of California; and Pat Hipley, Office of Earthquake Engineering, California Department of Transportation

Poster No. 17: Analysis of Some Strong Motion Records of CSMIP/Caltrans Downhole Arrays

Hamid Haddadi and Anthony Shakal, California Geological Survey; and Pat Hipley, Office of Earthquake Engineering, California Department of Transportation

Poster No. 18: Bay Area Toll Bridge Strong Motion Instrumentation

Pat Hipley and Li-Hong Sheng, Office of Earthquake Engineering, California Department of Transportation; and Moh Huang and Anthony Shakal, California Strong Motion Instrumentation Program, California Geological Survey

Poster No. 19: Design and Analysis of Major Bridges in Areas of High or Moderate Seismicity

*David N. Bilow, Portland Cement Association and Jingyu Huang, Maglev
Transportation Development Co., Ltd.*

**Poster No. 20: Seismic Design of the Temporary Bypass Structure for the New East Span of the
San Francisco-Oakland Bay Bridge**

Roy A. Imbsen, Consulting Engineer
